Jose Manuel Estrada 452

Mendoza, CP 5577, Argentina.

EDUCATION

PhD in Economics | *Economics*
The Pennsylvania State University

Ago 2026 – Dec. 2031
Pennsylvania, EEUU

Master of Science | *Economics*
University of San Andres

Feb. 2023 – Dec. 2023
Buenos Aires, Argentina

Bachelor of Arts | *Major: Economics*
University of Buenos Aires

Jul. 2018 – Jul. 2021
Buenos Aires, Argentina

WORK EXPERIENCE

Research Assistant
University of San Andres

Mar. 2025 – Present
Buenos Aires, Argentina

- I collaborated with Facundo Albornoz on modeling and programming, estimating regressions that examine firm behavior under diverse sectoral environments.
- I used Stata for data cleaning related to employment, trade, and firms, as well as for the estimation of econometric models.

Short Term Consultant
World Bank - DECRG

May. 2024 - Present
Washington DC, EEUU (Remote)

- I collaborated with Alejandro Molnar on the modeling, programming, and estimation of gravity equations and general equilibrium counterfactuals using international trade databases.
- I used Stata for the econometric estimation and R for the calibration of general equilibrium models to evaluate counterfactual scenarios. Also employed QGIS and georeferenced data in projects related to trade costs and multimodal transport networks.

Consultant
IADB

Mar. 2024 – May 2024
Washington DC, EEUU (Remote)

- I collaborated with Leticia Juarez on the modeling, programming, and estimation of regression models using international trade and sectorial databases.
- I used Stata for data cleaning related to employment, trade, and firms, as well as for the estimation of econometric models.

Research Assistant
University of San Andres

Jan. 2024 – Mar. 2024
Buenos Aires, Argentina

- I collaborated with Ezequiel Garcia-Lembergman on the modeling, programming, and estimation of Event Studies using international trade and sectorial databases.
- I used Stata for data cleaning related to employment, trade, and firms, as well as for the estimation of econometric models.

Productive Development Analyst
Fundar

Jun. 2022 – Feb. 2023
Buenos Aires, Argentina

- I worked together with Tomás Bril Mascarenhas, Juan Carlos Hallak, Leonardo Park, in the modeling, programming and estimation of simulation models for the analysis of public policies.
- I worked together with Matías Gutman, Lucía Pezzarini, Paula Luvini and Marcos Feloe in the application of the economic complexity approach as an input for the recommendation of public policies.

- I used Stata, Python, LaTeX and Microsoft Office Environment (Excel, Word) for different tasks.
- Member of the Productive Development team

Research Fellow

University of Buenos Aires - Center for Research in Econometrics

Oct. 2020 – Feb. 2023

Buenos Aires, Argentina

- I worked on the estimation of VAR and SVAR models, collaborating with data cleaning, mathematical development and calibration of the same. Director: Cintia Martinez. Co-Director: Silvia Vietri
- I used EViews, Stata, LaTeX and R programming for different tasks.

Advisor to the Secretary of Industry

Ministry of Productive Development

Mar. 2020 – Aug. 2020

Buenos Aires, Argentina

- I worked in the collection and cleaning of data from economic sectors for the preparation of policy reports.
- I used RStudio, Stata, Python and Excel programming for different tasks.

RESEARCH AND PROJECTS

3.1 Research

Elaboración de modelos de política monetaria: una aproximación empírica

2022

- Co-authored working paper with Cintia Martinez, Gonzalo Respighi, Silvia Vietri and Silvina Del Luca. I worked on the estimation of VAR and SVAR models, collaborating with data cleaning, mathematical development and calibration of the same.

Panorama de la Complejidad Económica del Municipio de Córdoba

2023

- Co-authored working paper with Paula Luvini and Constanza Cejas. I worked on the cleaning of firms and international trade databases, development of economic complexity indicators using Python and writing the document.

3.2 Projects

Hacia una transformación productiva posible en Tierra del Fuego

2022

- I collaborated on the work with Juan Carlos Hallak, Leonardo Park, and Belén Bentivegna. The tasks were cleaning both sectoral and international trade data and developing a simulation model for different scenarios.

Cyclical external borrowing, endogenous growth and debt sustainability

2023

- *Forthcoming Working Paper.* I collaborated on the work with Damián Pierri and Fernando Garcia-Belenguer Campo. My tasks were support in writing the document and creating figures in Tikz for a better understanding of the dynamics of the model and the stylized facts.

CONFERENCES AND PRESENTATIONS

AAEP Conference

National University of Cordoba

November 2022

Econometrics Annual Seminar

University of Buenos Aires

October 2022

TEACHING EXPERIENCE

Teaching Assistant - Dynamic Macroeconomics. Prof. Damián Pierri University of San Andres	Jul. 2024 - Present Buenos Aires, Argentina
Teaching Assistant - International Economics. Prof. Federico Bernini University of Buenos Aires	Mar. 2024 - Present Buenos Aires, Argentina
Teaching Assistant - Macroeconomics I. Prof. Pedro Elosegui University of San Andres	Mar. 2024 - Jul. 2024 Buenos Aires, Argentina
Teaching Assistant - Economics I. Prof. Franco Riottini University of San Andres	Mar. 2024 - Jul. 2024 Buenos Aires, Argentina
Teaching Assistant - Macroeconomics II. Prof. Damián Pierri University of Buenos Aires	Mar. 2020 - Feb. 2022 Buenos Aires, Argentina
Teaching Assistant - Microeconomics II. Prof. Gabriel Montes Rojas University of Buenos Aires	Aug. 2020 - Feb. 2022 Buenos Aires, Argentina
Teaching Assistant - Economic Growth. Prof. Danilo Trupkin University of Buenos Aires	Mar 2021 - Feb 2022 Buenos Aires, Argentina
Teaching Assistant - Mathematics for Economists. Prof. Eduardo Rodriguez University of Buenos Aires	Nov. 2021 - Feb. 2022 Buenos Aires, Argentina
Teaching Assistant - National Accounts. Prof. Silvana Cavallari University of Buenos Aires	Jun. 2019 - Feb. 2022 Buenos Aires, Argentina

SKILLS

Languages: Spanish (Native), English (B2),

Programming:

- Python (NumPy, SciPy, Matplotlib, Pandas and Big data related tools) (Advanced)
- Julia (Advanced)
- MATLAB (Advanced)
- Stata (Advanced)
- R (Advanced)
- EViews (Intermediate)
- Excel (Advanced)
- GIS (with QGIS (openstreetmap, gdal) and R packages (sf, leaflet, mapview))

Document Creation: Microsoft Office Suite, LaTeX, Markdown
